Minor restatement of 2022 and 2023 Scope 1 and 2 GHG emissions after clarifications on town gas emissions factors in Hong Kong and Singapore.

¹ Medical waste is >95% of our hazardous waste footprint. All hazardous waste are managed according to local regulatory requirements and are considered as diverted to disposal either as incinerated or treated before landfill.

² Regulatory requirements on data collection differ by countries. Data does not include non-hazardous waste from Turkiye and Europe.

³ Hazardous waste for 2023 figures restated.

⁴ All water used are municipal potable water.

⁵ Defined as High and Extremely High on the Water Stress levels in the World Resources Institute's tool – Aqueduct Water Risk Atlas.
